DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:
 - a. Species I, a mirror wherein the display comprises a hologram.
 - b. Species II, a mirror wherein behind the mirror surface, at least one loudspeaker is connected to the display.
 - c. Species III, a mirror wherein the frame is composed of channel profiles members having a width (b) that determines the depth of the mirror interior.
 - d. Species IV, a mirror wherein the display is secured to a frame by at least one strut.
 - e. Species V, a mirror wherein the loudspeaker is associated with a perforated region of a frame.
 - f. Species VI, a mirror including a radio receiver module for the image data.
 - g. Species VII, a mirror including an integrated remote operating means for volume control.
 - h. Species VIII, a mirror wherein behind the mirror surface, at least one loudspeaker is connected to an input device.

The species are independent or distinct because they have a different design, mode of operation, and/or function.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no species appears to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
